

AMENDATORY SECTION (Amending WSR 05-23-162, filed 11/22/05, effective 1/1/06)

WAC 296-17-855 Experience modification. The basis of the experience modification shall be a comparison of the actual losses charged to an employer during the experience period with the expected losses ((which would be expected)) for an average employer reporting the same exposures in each classification. The comparison shall contain actuarial refinements designed to ((mitigate the effects of losses which may be considered catastrophic or of doubtful statistical significance)) weigh the extent to which the actual experience is credible, due consideration being given to the volume of the employer's experience. Except for those employers who qualify for an adjusted experience modification as specified in WAC 296-17-860 or 296-17-865, the experience modification factor shall be calculated from the formula:

$$((\text{MODIFICATION} = \frac{\text{Ap} + \text{WAe} + (1 - \text{W}) \text{Ee} + \text{B}}{\text{E} + \text{B}}))$$

$$\begin{array}{ccl} \text{EXPERIENCE} & & (\text{Credible Actual Primary Loss} + \\ \text{MODIFICATION} & \equiv & \text{Credible Actual Excess} \\ \text{FACTOR} & & \text{Loss}) / \text{Expected Loss} \end{array}$$

Where

$$\begin{array}{ll} \text{Credible Actual} & \equiv \text{Actual Primary Loss} \times \text{Primary} \\ \text{Primary Loss} & \text{Credibility} \\ \pm & \text{Expected Primary Loss} \times (100\% - \\ & \text{Primary Credibility}) \\ \text{Credible Actual} & \equiv \text{Actual Excess Loss} \times \text{Excess} \\ \text{Excess Loss} & \text{Credibility} \\ \pm & \text{Expected Excess Loss} \times (100\% - \\ & \text{Excess Credibility}) \end{array}$$

((The components Ap, WAe, and (1 - W) Ee are values which shall be charged against an employer's experience record. The component, E, shall be the expected value of these charges for an average employer reporting the same exposures in each classification.)) The meaning and function of each ((symbol)) term in the formula is specified below.

((("Ap" signifies "primary actual losses.")) For each claim, the actual primary ((actual)) loss is ((defined as that portion of the claim which is considered completely rateable for all employers and which is to enter the experience modification calculation at its full value)) the first dollar portion of the

claim costs, which has been shown in actuarial studies, to have the greater credibility in predicting future experience. These amounts are summed over all claims. For each claim in excess of ((~~\$18,972)~~ \$19,560 the actual primary ((actual)) loss shall be determined from the formula:

$$\frac{\text{ACTUAL}}{\text{PRIMARY LOSS}} = \frac{((47,430)) \underline{48.900}}{(\text{Total loss} + ((28,458))) \underline{29,340})}$$

x total loss

((Primary actual losses for selected claim values are shown in Table I.)) For each claim, less than ((~~\$18,972)~~ \$19,560 the full value of the claim shall be considered a primary loss.

((~~"Ae" signifies "excess actual losses."~~)) For each claim, the excess actual loss is ((defined as that portion of the claim which is not considered completely rateable for all employers)) the remaining portion of the claim costs, which have been shown in actuarial studies to have less credibility in predicting future experience. The excess actual loss for each claim shall be determined by subtracting the primary loss from the total loss. These amounts are summed over all claims.

For any claim without disability benefits (time loss, partial permanent disability, total permanent disability or death) either actually paid or estimated to be paid, the total actual losses for calculating the primary loss and excess loss shall first be reduced by the lesser of \$1,510 or the total cost of the claim. Here are some examples for these claims:

Total Loss	Total Loss (after deduction)	Primary Loss	Excess Loss
<u>200</u>	=	=	=
<u>2,000</u>	<u>490</u>	<u>490</u>	=
<u>20,000</u>	<u>18,490</u>	<u>18,490</u>	=
<u>200,000</u>	<u>198,490</u>	<u>42,603</u>	<u>155,887</u>
<u>2,000,000</u>	<u>487,490</u>	<u>46,124</u>	<u>441,366</u>

Note: The deduction, \$1,510, is twice the average case incurred cost of these types of claims occurring during the three-year period used for experience rating. On average this results in reducing the average actual loss about seventy percent for these types of claims adjusted. This is done to help make the transition between the two different experience rating methods better by helping make the change in experience factor reasonable for small changes to the actual losses. The \$2,000,000 loss is limited by the Maximum Claim Value before the reduction of \$1,510 is applied.

((~~"W" signifies "W value."~~)) For each employer, the ((W value)) primary credibility and the excess credibility determines the ((portion of)) percentage weight given to the corresponding actual primary losses and the actual excess losses ((which shall be)), included in the calculation of ((his)) the experience modification, ((due consideration being given to)) based on the volume of ((his experience)) expected losses.

((This amount is represented by the symbol "W_{Ae}" in the experience modification formula. W values)) Primary credibility and excess credibility values are set forth in Table II.

(("E" signifies "expected losses.")) An employer's expected losses shall be determined by summing the expected loss for each of the three years of the experience period, which are calculated by multiplying ((his)) the reported exposure in each classification during the ((experience period)) year by the corresponding classification expected loss rate and rounding the result to the nearest cent. Classification expected loss rates by year are set forth in Table III.

(("Ee" signifies "expected excess losses.")) Expected losses in each classification shall be multiplied by the classification "((D)) Primary-Ratio" to obtain "expected primary losses((.))" which shall be rounded to the nearest cent. Expected excess losses shall then be calculated by subtracting expected primary losses from expected total losses rounded to the nearest cent. ((Each employer shall have a statistical charge included in the calculation of his experience modification, said charge to be actuarially equivalent to the amount forgiven an average employer because of the exclusion of a portion of his excess actual losses. This charge is represented by "(1 W) Ee" in the experience modification formula. D)) Primary-Ratios are also set forth in Table III.

(("B" signifies "B value" or "ballast." In order to limit the effect of a single severe accident on the modification of a small employer, a stabilizing element (B value) shall be added to both actual and expected losses. B values are set forth in Table II.))

AMENDATORY SECTION (Amending WSR 05-23-162, filed 11/22/05, effective 1/1/06)

AMENDATORY SECTION (Amending WSR 05-23-162, filed 11/22/05,
effective 1/1/06)

WAC 296-17-920 Assessment for supplemental pension fund.

The amount of ((31.2 mills (\$.0312))) 33.4 mils (\$0.0334) shall be retained by each employer from the earnings of each worker for each hour or fraction thereof the worker is employed. The amount of money so retained from the employee shall be matched in an equal amount by each employer, except as otherwise provided in these rules, all such moneys shall be remitted to the department on or before the last day of January, April, July and October of each year for the preceding calendar quarter, provided self-insured employers shall remit to the department as provided under WAC 296-15-060. All such moneys shall be deposited in the supplemental pension fund.
